DETAILED ACTION

Claims 10-11 are pending.

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

The indicated allowability of claims 10-11 is withdrawn in view of the consideration of reference(s) to Mercurio, 2004/0116544. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1712

4. Claims 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mercurio, US 2004/0002550 or 2004/0116544.

Claims 10-11 are directed to an invention not patentably distinct from claims of commonly assigned Mercurio, US 2004/0002550 or 2004/0116544. Specifically, Mercurio discloses post foaming compositions incorporating a biliquid foam. Mercurio (column 1) characterizes the compositions as not requiring high pressures and not requiring aerosol cans.

Mercurio differs from the claims in the desired use of low pressure packaging systems rather than a pressurized aerosol can.

Although Mercurio discloses the preferred use of low pressure packaging systems and thus low pressure systems, it would have been obvious to one having ordinary skill in the art at the time of applicants' invention to employ a high pressure aerosol can with a reasonable expectation of success.

The U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP Chapter 2300). Commonly assigned Mercurio, US 2004/0002550 or 2004/0116544, discussed above, would form the basis for a rejection of the noted claims under 35 U.S.C. 103(a) if the commonly assigned case qualifies as prior art under 35 U.S.C. 102(e), (f) or (g) and the conflicting inventions were not commonly owned at the time the invention in this application was made. In order for the examiner to resolve this issue, the assignee can, under 35 U.S.C. 103(c) and 37 CFR 1.78(c), either show that the

conflicting inventions were commonly owned at the time the invention in this application was made, or name the prior inventor of the conflicting subject matter.

A showing that the inventions were commonly owned at the time the invention in this application was made will preclude a rejection under 35 U.S.C. 103(a) based upon the commonly assigned case as a reference under 35 U.S.C. 102(f) or (g), or 35 U.S.C. 102(e) for applications pending on or after December 10, 2004.

Response to Arguments

5. Applicant's arguments with respect to claims 10-11 have been considered but are moot in view of the new ground(s) of rejection.
